Trauma Association of Canada
Association Canadienne de Traumatologie

Interdisciplinary Trauma Network of Canada

May 5, 2016 Halifax, Nova Scotia

Evaluation Summary:

Two things you found most useful about the day summary of 33 responses:

Rapid Fire (10), Group discussion/Case studies (11), Networking (7), Injury Prevention (1), Paeds (1), Reports (1), keynote (2)

1. rapid fire
2. rapid fire
3. rapid fire:always great!
4. rapid fire
5. rapid fire sessions
6. rapid fires
7. rapid fires
8. rapid presentations
9. rapid fires
10. time keeping for rapid fire
11. group discussion
12. group discussion was very useful
13. table top discussions are a good way to get to know others and what interesting approaches and projects they have
14. discussions round table
15. discussions on the cases
16. round tables
17. breakout discussion and group debriefing
18. case studies
19. case studies discussion
20. group discussion and case studies
21. brainstorming topics in am interesting
22. networking/learning of other centre' ideas and opportunities/challenges resources and case studies
23. networking with other roles and hospitals to make connections
24. networking
25. networking
26. great way to learn and network
27. networking
28. group discussion-help to build networking
29. injury prevention
30. lots of paeds-great!
31. Reports
32. keynote speaker
33. keynote speaker-excellent!

Two things you would change about the day:

- can't think of anything!
- nothing
- 3-4 webinars/year
- would like to understand other provinces better
- provide more opportunities to share highlights from various provinces and hospitals (highlight successful quality improvement)
- not use case studies for discussion
- add more networking time throughout the day (lunch was even cut short)
- increased opportunity breakout to network more
- pre breakout -start with something inspiring, energizing
- change the pre breakout to a one page handout
- first time at the ITNC meeting outside of the business meeting update it wasn't clear what the focus of this group was
- rapid fire timing (talks exceeded 8 min)
- add a professional development session
- allow more time for questions during business meeting
- beverage option offered in the rooms

Please identify any activities, tasks or strategies you would like to see your ITNC or TRISC executive or TAC BOD undertake next year on your behalf

- 3-4 webinars per year
- increase communication to/between members
- allow more members the opportunity to engage in collaboratives, working groups
- be sure to keep this day-not part of the two day conference
- contact list of all ITNC and TRISC members available to members
- keep ITNC day
- this is the day that provides the pearls to take back to my organization. it allows connections to support the work we do
- Although I enjoy TAC and research presentations, if I had to choose to go to one or the other I would choose ITNC, thankfully I don't have to choose!!

When planning next year's annual general meeting and professional development sessions are there key things you would like added to the agenda? Comments or suggested future professional development topics.

- strategy session-what's next for ITNC (or on exec update discussion on that front)
- 1 presentation per presenter-get more presenters too
- don't repeat the same people as speakers, lots of people who could present
- good rapid fire presentations but are there other members who could speak rather that 2 of the same presenters
- Potentially reach out to all members personally to invite rapid fire speakers, maybe 6 months prior to conference ?maybe more variety of presenters?
- have quality improvement projects presented from successful sites

- maybe bring back intentional injuries gang related stuff to see if people have new development policies to share, experience to share.
- emerging issues in trauma (IP and clinical)
- leadership/development sessions
- innovation/design science
- quality improvement science
- CQI
- New Brunswick Trauma Program topics
- differences/similarities Trauma Team Activation's
- you are doing a great job
- use web based evaluations of each presenter or maybe use one page for all 6, that way we can compare the speakers better to judge better and more fairly
- too many evaluation questions required for completion for each rapid fire presenter
- it's a good way to meet people to learn about what others are doing experiencing what we can do differently
- don't have 6 evaluation forms for talks (waste of paper) create an app to log evaluation in real time or one page with all the speakers where you rate them based on topic for speech.
- do we need to evaluate the case studies?
- condense evaluation of rapid fire to one page or online solution
- concussion assessment and data capture
- I appreciate that the notes will be shared with all
- Keynote was not the best presentation to end the day, too nursing focused was looking for inspiration, energizing rejuvenating presentation
