

Statement on Care of the Injured Patient

TAC strongly endorses the principle of a rigorous, evidence-based, regular, accreditation process for trauma care.

The Trauma Association of Canada endorses the *Resources for Optimal Care of the Injured Patient* (aka the Grey Book, released March 2022, revised December 2023) as a general set of standards in trauma care that can be applied to Trauma Centres in Canada. The Verification, Review, and Consultation (VRC) Program by the ACS-COT and the INESSS Program in Quebec both represent endorsed pathways to improve the quality of injury care in Canadian trauma centres.

*Approved by TAC Board of Directors
