READINESS & RESPONSE IN A CHANGING WORLD

Trauma Association of Canada
Annual Scientific Meeting & Conference

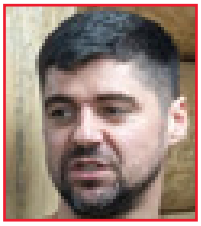
JOIN US IN CALGARY! April 22-24, 2026

Four exceptional keynotes. One powerful community.

WHY ATTEND?

- Learn from global and national experts
- Gain practical, real-world insights you can apply immediately
- Connect with Canada's trauma community across disciplines
- Be part of shaping the future of trauma care in Canada

Global Insight. Real-World Impact.



Dr Roman Kuziv
A frontline trauma surgeon working in the **war in Ukraine**, Dr Kuziv brings rare, firsthand insight into **modern combat injuries, evolving wound patterns, and trauma system innovation under extreme pressure**. His keynote will reveal how wartime medicine is reshaping trauma care worldwide – and what civilian systems must learn now.

Dr Margaret Bourdeaux
An internationally recognized leader in **health system resilience and emergency response**, Dr Bourdeaux will present a powerful keynote on **adapting trauma systems to global instability, disasters, and emerging threats** – offering strategic insights for building stronger, future-ready systems.

Dr Ian Pike
A national leader in **injury prevention and public health**, Dr Pike will deliver the **Murray Girotti Lecture**, **examining how we can predict, prevent, and reduce injury at a population level**, and why prevention must remain central to modern trauma systems.

Dr Emilie Joos
An expert in **humanitarian and conflict medicine**, Dr Joos will explore the realities of delivering care in **resource-constrained and crisis environments, focusing on system resilience, adaptability, and ethical decision-making** in high-stakes trauma care.

A PROGRAM BUILT FOR THE ENTIRE TRAUMA COMMUNITY

This year's conference offers a **dynamic, interdisciplinary program** across the full continuum of trauma care:

- **Clinical & Surgical Excellence** – cutting-edge care and case-based learning
- **System Leadership & Performance** – quality improvement and trauma team optimization
- **Pre-Hospital & Transport Medicine** – innovations from scene to hospital
- **Military & Disaster Medicine** – lessons from complex, high-risk environments
- **Injury Prevention & Public Health** – strategies that save lives before injury occurs

With **multiple concurrent streams**, attendees can tailor their experience to their role and interests.
